**THE PERFECT FIT**

Scoop, Truck,  
Jumbo and  
OEM Cylinder  
Replacements

# "State-of-the-art" Design & Manufacturing

The Cylinder Division of Mining Technologies International Inc. means more than just quality, affordable hydraulic and pneumatic cylinders. It means "state-of-the-art" design and manufacturing techniques, top quality OEM replacement parts, and most important of all, superior customer service.

Our team of highly skilled professionals continues to lead the way in the development of new technologies and innovative solutions to complex cylinder problems. In keeping with our philosophy of unparalleled support, **MTI** provides cost saving repairs, upgrades or re-engineering to all makes and models of cylinders. With a vast computer database of repair analysis on every cylinder processed, our expertise and knowledge is unsurpassed in the industry.

For over three decades **MTI's** dedication to excellence has proven itself in the tough, unforgiving environments of mining, forestry, and heavy industry. From the small independent operator to multinational corporations, our cylinders are delivering dependability and performance the world over. Whether you require a custom-built product or one of thousands off the shelf items, **MTI** can supply the hydraulic and pneumatic cylinder configurations that are right for the job.

**MTI** is an ISO 9001-2000 company and is Canadian Welding Bureau certified. Our Computer Numeric Controlled (CNC) manufacturing and pretesting ensures that each product we ship will meet or exceed these standards.
